

I'm writing this to let you know I'm against the proposed changes to FM radio broadcasts. If this is passed, stations like AIR1 could be forced off the air in many communities. AIR1 broadcasts hopeful and uplifting messages, plays positive music, and tells people that are down on their luck places they can go for help. NONE of the local stations do that. All I hear from local or syndicated DJ's is filth. Not to mention the lyrics in some of the music they play.

The loss of stations like AIR1 would be a great loss to all in this country. Please do not do anything that would cause us to lose these types of programs.
